Datasheet BBox One 5G 28 GHz

BB-ONE-BP01B-284A

5G era is coming soon. Massive deployment is expected in 2021 worldwide. IMT-2020 defines eMBB, URLLC and mMTC which are keys to successful 5G communications. TMYTEK has developed a compact but development tool to help our customers in moving onto 5G beamforming developments and tests with ease. We call it the BBox[™] One. It consists of 16 channel RF control, standard antenna kit and API software control through ethernet interface.

Our BBox[™] One is the most critical module in the whole BBox[™] building blocks and that is because it is where the main mmWave functions happen. BBox[™] One provides the ability to do phase and amplitude control through ethernet connection. It comprises of RF components such as T/R switch, LNA/PA and phase shifters as well as our standard antenna for 5G beam steering. More details are outlined below.

Features

- Operating Frequency: 26.5 to 29.5 GHz
- Designed for 5G n257 band (including n261 band)
- Up to16 controllable RF channels with the choice of 4x4 or 8x8 series patch antenna
- Each channel provides:
 - 360° phase shifter coverage with 5° per step
 - RMS phase error: 4° (typical)
 - o 15 dB attenuation range with 0.5 dB per step
 - RMS attenuation error: 0.35 dB (typical)
- T/R half duplex operation
- Typical T/R mode switching time: 2 ms (Ethernet)/ 10ns (GPIO)¹
- Typical beam steering time: 2 ms (Ethernet)/ 140 ns (SPI)²
- PC software control via RJ-45 Ethernet interface
- FPGA/ SDR control via SPI interface
- Key components are RoHS compliant

Figure 1. BBox™ One 5G 28 GHz

Figure 2. 5G Beamformer System Diagram (4 channels)

¹Depends on host GPIO

²Under beam table pre-config, the minimum beam steering latency is approximately 140 ns via 100MHz SPI interface.

Single Channel RF Specifications

Parameter	Conditions	Unit	Min.	Тур.	Max.
Operating Frequency Range	Without antenna GHz 26.5 28		29.5		
Movimum Coin	Tx Mode	dB	8	10	12
Maximum Gain	Rx Mode	dB	0	2	4
Noise Figure	Rx Mode	dB		20	22
OP1dB	Tx Mode	dBm	10	12	14
IP1dB	Rx Mode	dBm	-23	-21	-19
Phase Shifting Range		deg		360	
Phase Shifting Step		deg		5	
RMS Phase Error		deg		4	
	Common Gain + Channel gain	dB		15	
Attenuator Range	Common Gain	dB	6.5	7.5	8
	Channel Gain	dB	6.5	7.5	8
Attenuator Step		dB		0.5	
RMS Attenuation Error		dB		0.35	
Return Loss	RF Port (Tx)	dB	7	10	
	RF Port (Rx)	dB	7	10	
	COM Port	dB		7	
Channel-to-Channel Isolation	Maximum gain setting-Tx	dB		25	
	Maximum gain setting-Rx	dB		30	

System RF Specifications

Parameter	Conditions	Unit	Min.	Тур.	Max.
Antenna Array Size				4x4	
Operating Frequency Range	With antenna, compliant with n257 and n261 band	GHz	26.5		29.5
Number of Controllable Channels				16	
Antenna Array Gain		dBi	16	17.5	
Transmitter Maximum Gain		dB	38	39.5	
Transmitter EIRP		dBm	40	41.5	
Maximum Input Power	Tx Mode	dBm		2	
Receiver Maximum Gain		dB	30	31.5	
Beam Steering Range	Vertical	deg		±45	
	Horizontal	deg		±45	
3dB Beamwidth	Broadside, Vertical	deg		25	30
	Broadside, Horizontal	deg		25	30

DC and Control Specifications

Parameter	Conditions	Unit	Min.	Тур.	Max.
Power Consumption	Tx Mode	W			10
	Rx Mode	W			9
Supply Voltage		Vdc		5	
T/R Switching Time	Between Tx and Rx modes	ms		2	
Beam Steering Time*1	Dependent on CPU speed	ms		2	
Channel ON/OFF Time		ms		2	

AC Specifications

Parameter	Conditions	Unit	Min.	Тур.	Max.
Adapter Input Voltage		Vac	100		240
Adapter Input Current Consumption		A			0.7

Software Control Interface

The BBox[™] One software interface offers both UI and API control which are completely designed in house by our software team. Our patented software algorithm offers better accuracy and easier control on the beam angles. The module can be controlled either by RJ-45 ethernet cable or USB cable. Both the UI and API are available for our customers to access and download from the Web. The user interface shows the 16-channel phase and amplitude control block diagram as depicted below. To control the parameters, please drag the dB and Φ slide bars on the desired channel to make the changes. The left portion of the interface shows the beam steering angle. This can be used together with our standard antenna kit to control the steering angle.
